PROFESSIONAL SUMMARY

Operations and program management professional with 4+ years across AI strategy consulting and startup operations, leading cross-functional programs, go-to-market execution, and change management from scoping to measurable results.

Core Skills: Program Management | Go-to-Market Strategy | Change Management | Cross-functional Execution

Tools: SQL, Python, Node.js, REST APIs, Webhooks, PostgreSQL, GitHub, Google Cloud, HubSpot, Shopify, QuickBooks Online, Claude

PROFESSIONAL EXPERIENCE

Clove, Brand Inc. - Philadelphia, PA

Senior Operations Analyst *January 2025 - Present*

- Designed and launched a 5-tier wholesale partner incentive program with tiered pricing, payment discounts, and shipping benefits, contributing to established accounts doubling their average monthly reorder revenue in the first quarter after launch
- Spearheaded a three-month Claude adoption initiative: prioritized use cases through time studies, presented Claude-built apps at a company all hands, and trained 22 employees on Claude; the apps are now used daily by 10 employees, nearly half the company
- Drive Clove's Korean market entry with distributor WG Company; sized the initial 1,000 pair shipment from sell-through data, served as direct liaison to WG Company's CEO on launch strategy, and navigated a trademark dispute to protect the launch
- Developed and deployed three Shopify apps with Claude Code and Cowork: QuickDraft for bulk retailer orders, Preorder Bulk Editor for SKU-level preorder dates, and a B2B invoice app that integrates Shopify webhooks, the Extensiv 3PL API, and QuickBooks Online to bill only shipped quantities, eliminating $10,400-$13,000 in annual labor costs
- Established a CX order-audit process with Claude and handed it off to the CX team, refining it through user feedback; saves 2 hours per week and shifts that time to following up with new retailer leads, creating orders, and resolving tickets
- Coordinated new product launch readiness across SKU/UPC creation, product photography, and multichannel setup alongside factory timelines; automated manual steps with Claude, reducing listing turnaround from days to hours
- Brought demand forecasting in-house, saving $10,000 per month in vendor costs; built forecasting dashboards for new styles without sales history and optimized core-style replenishment, cutting projected 2027 stockout losses 84% versus 2026

Operations Analyst *October 2023 - December 2024*

- Built a SQL data pipeline connecting Shopify to Google Cloud and monthly operations dashboards; partnered with the CEO and COO to translate customer, sales, and inventory insights into pricing, promotional, and operational strategies
- Trained and managed a cross-functional wholesale team (CX, Finance, Operations) and built its processes from scratch, absorbing four new channels (SPS Commerce EDI, The Uniform Solution, QVC, Amazon) and rising order volume without adding headcount
- Launched 'Sample Sale,' a new sales channel for returned inventory, designing a grading SOP for returned pairs and training the team on execution; cut annual discarded units by 69% and scaled the channel to $71K in revenue after its first year
- Managed major trade shows and brand collaboration launches end to end, sourcing collaboration merchandise that retailers continue to reorder; protected launch dates through contingency plans, and a recent show led to a $36K order from a new retailer

Primestone Consulting - Seoul, South Korea *July 2023 - September 2023*

Business Operations Intern

- Identified the absence of operational structure at an early-stage consulting practice and independently built its first workflow guide
- Standardized client documentation and performance reporting across 15+ accounts

Deloitte Consulting LLP - Chicago, IL *January 2022 - December 2022*

Applied AI Analyst - Strategy & Analytics

- Data Analyst (Data Mapping Team) - Fortune 500 Financial Institution
    - Defined mapping logic for system of record (SOR) by addressing regulatory requirements, analyzed data from Hadoop using SQL, and provided recommendations for SOR selection
    - Led an offshore team, completing daily handoffs, delegating duties for the day, and resolving issues
- Conversational AI Strategy Analyst - Fortune 500 Insurance Company
    - Contributed to a conversational AI adoption roadmap across Personal Risk Services and Claims, aligning AI capabilities with customer experience goals and organizational change management needs
    - Assessed organizational readiness and enablement gaps to inform use case selection, rollout planning, and stakeholder alignment

EDUCATION

Indiana University, School of Informatics and Computing, Bloomington, IN *December 2021*

Bachelor of Science in Informatics with Business Cognate
